Professional Summary

Currently, I'm pursuing a B.Tech in Cse with a specialization in AI from Parul University, and at the same time, I am employed as a Full Stack Developer. I work on enhancing the user interaction for web applications and also have a decent grasp of DSA. In addition, I possess an acute analytical, creative, and problem-solving skills which aid me in crafting solutions for complex challenges. Among the many technologies I have worked with, I can mention Deep Learning, JavaScript, Python, SQL, HTML, and ReactJs. I developed AI-based applications like the Gold Prediction App, CuraBot, and the Automated Resume Generator. That said, I want to explore advanced technologies and engage in more complex projects in an innovative firm.
